## Technical Skills

---

**Languages** JavaScript, TypeScript, ClojureScript, Objective-C, Java, Bash

**VCS** Git

**OS** OS X, iOS, Android

**Development tools** Emacs, Xcode, Android Studio

## Experience

---

### Software developer

Jan 2018 - Present

EPAM Systems, St. Petersburg, Russia

<https://epam.com>

Multiple projects:

**PoC of mobile application to work with bluetooth devices (tonometers and pill devices).**

*Technologies - ReactNative, JavaScript.*

Finished an existed application to present to customer.

**PoC of mobile application for medical researches.**

*Technologies - ReactNative, JavaScript.*

Maintained existed application to present to customers.

### myPH, miHP

<https://itunes.apple.com/ch/app/myph/id1438106777>

Mobile applications to monitor clients medication.

*Technologies - ReactNative, TypeScript, Fastlane, Objective-C, Java.*

Have been developing an applications with shared codebase for iOS and Android. Responsible for full development cycle, from estimations to presentation to customer. Negotiated with customers about features and presented results of development. Had been maintaining CI (Jenkins) and constantly had been improving our build system to easily get new builds. Most of the time I was the only developer due to restricted budget.

### Frontend software developer

Jul 2016 - Dec 2018

OOO "CNS", Moscow, Russia (remote position)

<https://domclick.ru>

### Mortgage service

The main idea behind the project was to reduce offline effort for a client to get a mortgage.

*Technologies - JavaScript (React, Redux), Docker.*

Developed frontend part of [ipoteka.domclick.ru](https://ipoteka.domclick.ru). Worked on one of agile teams. Was responsible for full developing cycle, from estimations to delivery. My biggest achievement is frequent releases (at some point it was even every day, but mostly few times a week). Worked tightly with QA engineers as quality of my part was one of my direct responsibilities.

## Frontend software developer

Jun 2015 - Jun 2016

Calvera, St. Petersburg, Russia

<http://calvera.su>

Multiple projects:

### Real estate search service

The service was built around idea of detailed view of real estates with detailed description, lots of photos and planes.

*Technologies - JavaScript (backbone, marionette, virtual-dom).*

I was working on key area of project - detailed vew of real estate object, created almost all functionality on frontend side for this page. Worked with junior developers at different time of project(?). Setted up environment for team (build system and etc.).

### Book reader

Our owner had book and wanted to have an mobile application for it.

*Technologies - ReactNative, ClojureScript.*

Built a complete application for iPad.

## Junior software developer

Jan 2014 - April 2014

ICreative, Omsk, Russia

Multiple projects

*Technologies - JavaScript, PHP.*

Worked in a small outsource team. Helped senior colleagues with maintaining existed projects and develop new ones. Learned to work with JS and PHP. Was trying to solve tasks myself under supervision of team-lead.

## Education

UNIVERSITY

Irkutsk State University of Railway Transportation

Sep 2009 - Jun 2014

Engineer
